

Step-by-Step Guide: How to Buy \$AQUA

This guide will walk you through the process of purchasing \$AQUA coins—even if you’ve never bought cryptocurrency before. It’s simple, and you can complete it in under 5 minutes.

What is \$AQUA?

\$AQUA is a community-driven meme coin created to celebrate and raise awareness about water in a fun and impactful way. Our community, The AQUA Tribe, will share memes, videos, art, and participate in events related to water.

Our goals for \$AQUA:

- Celebrate the importance of water through engaging content.
- Support and promote individuals and companies working toward cleaner water.
- Enable companies to exchange loyalty points for \$AQUA (coming later).
- Inspire the community to donate \$AQUA to water-related nonprofit initiatives.

How is \$AQUA launched?

We are launching \$AQUA through a discounted presale, making it as easy as possible to participate.

Follow the steps below, and even if you’re new to crypto, you’ll be able to purchase \$AQUA confidently.

STEP 1:

You need Solana (SOL) coins to buy \$AQUA.

The simplest way to buy SOL if you have never done it before, is to sign up and register at coinbase.com. There are many instructions how to sign up and here is a great video that makes this step simple.

How to sign up to Coinbase.

<https://youtu.be/MGWHka7scvc?si=3aID-YD-POVv9qfR>

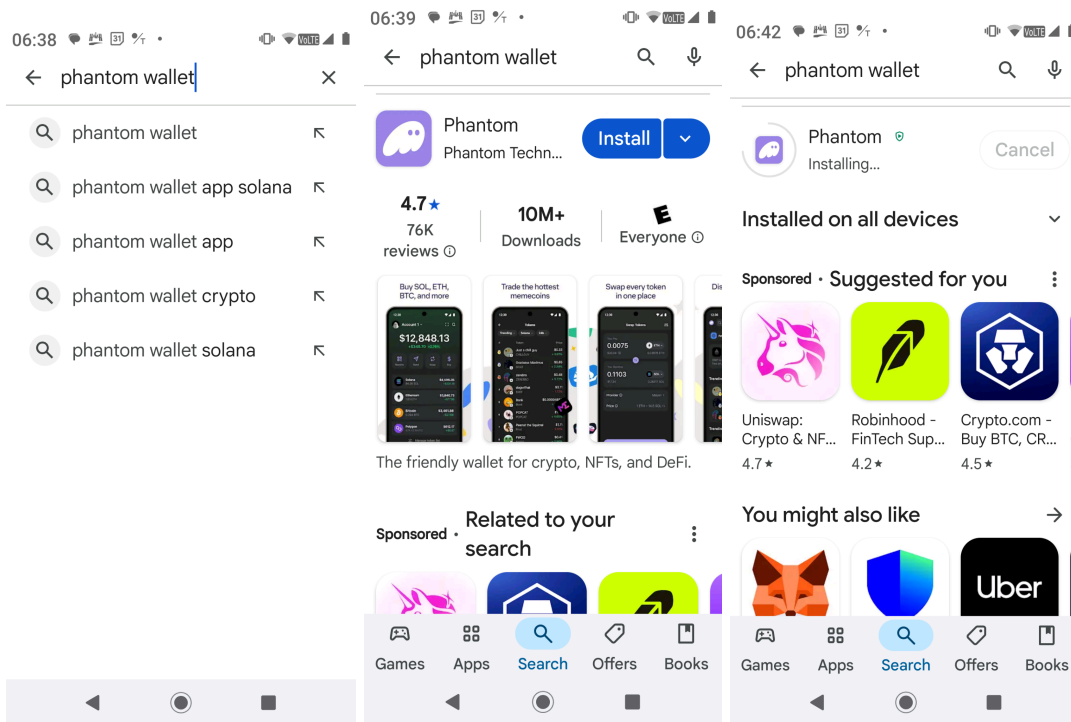

After you have registered and logged in, you need to buy SOLANA coins.

Here is a video how to buy coins when you are using Coinbase:

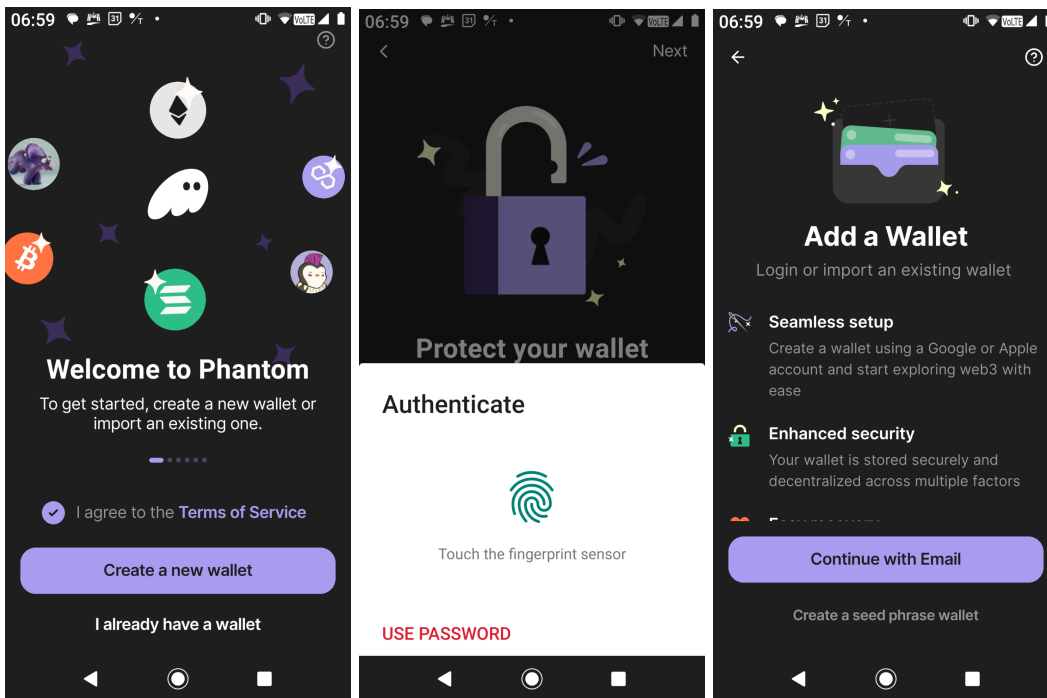

STEP 2:

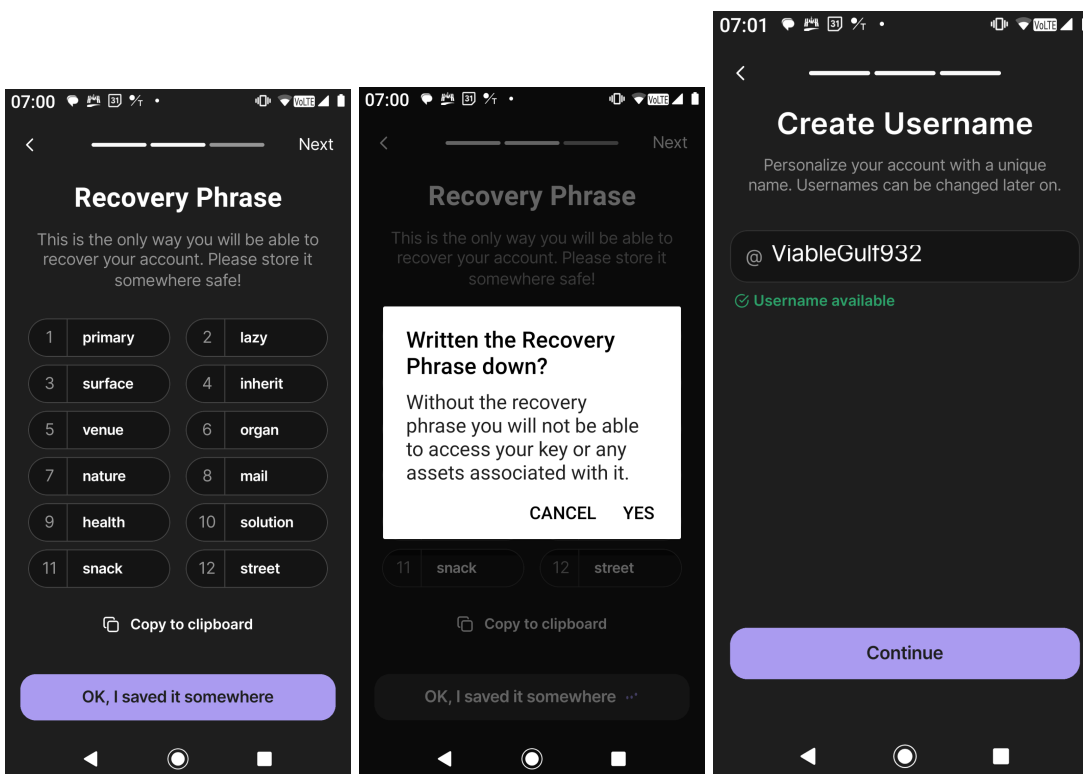

You also need a Phantom wallet which is the most popular SOLANA wallet in the world. You will use the Phantom wallet to buy the \$AQUA coins and you will receive the coins, after the Presale is over, to your Phantom wallet. Here is how you register the Phantom wallet.

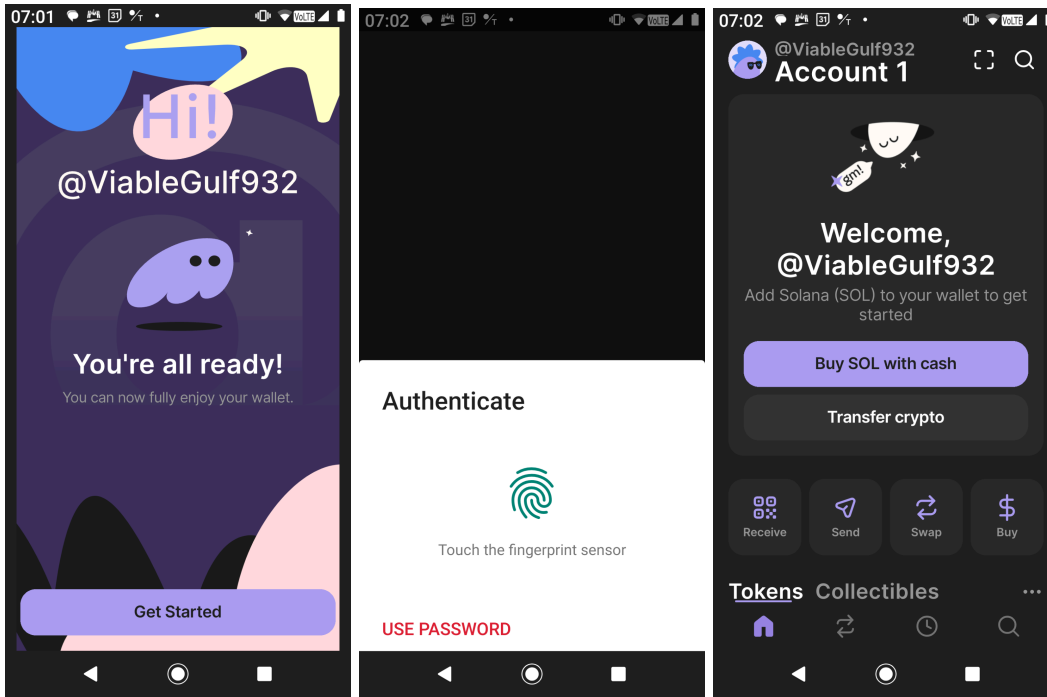

Go to your app store on your mobile and download Phantom, make sure it's the correct application, see screenshots.

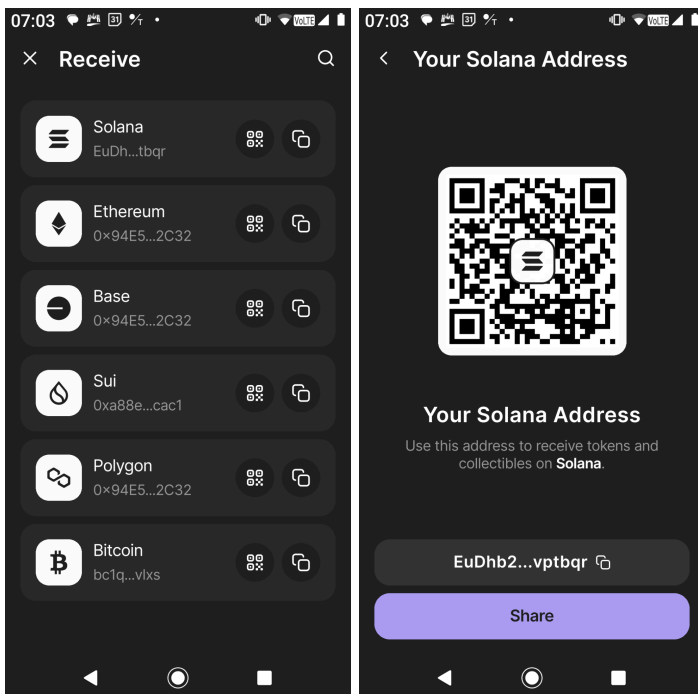

Start the app and NOTE: MAKE SURE TO SELECT “CREATE A SEE PHRASE WALLET”

Make sure to save the Recovery Phrase (very important) and then create a Username

You are now logged in and will be coming to the home page, select now RECEIVE

Here, simply click on Solana and then click on the “COPY” icon to copy the address. Remember the first and last letters so you can verify in Coinbase that you send it to the right address (important).

Step 3

Now that you have copied the SOL address in your Phantom wallet, just go back to Coinbase so that you can buy and send SOL coins to Phantom.

Follow this video. Note at some point, CoinBase will ask you to use a debit/credit card to buy these SOL coins, just follow the instructions in the CoinBase app and the money will be charged to your card. Remember to check that you really paste in your Phantom SOL address that you copied before. Here is the video how to send SOL to your Phantom wallet:

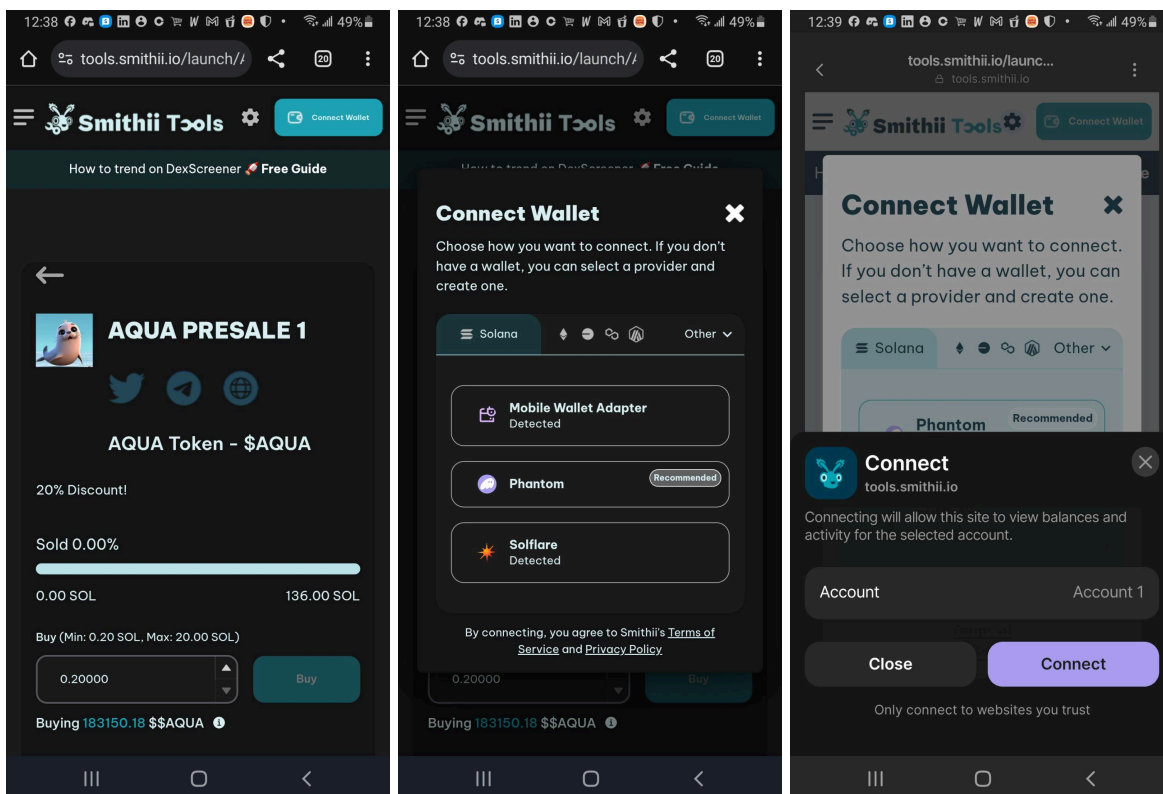

<https://youtu.be/WZIPKhC3CBI?si=xGBIqCfKiBHW9J0E>

After you followed the instructions, check your Phantom wallet and make sure the SOL you sent was received.

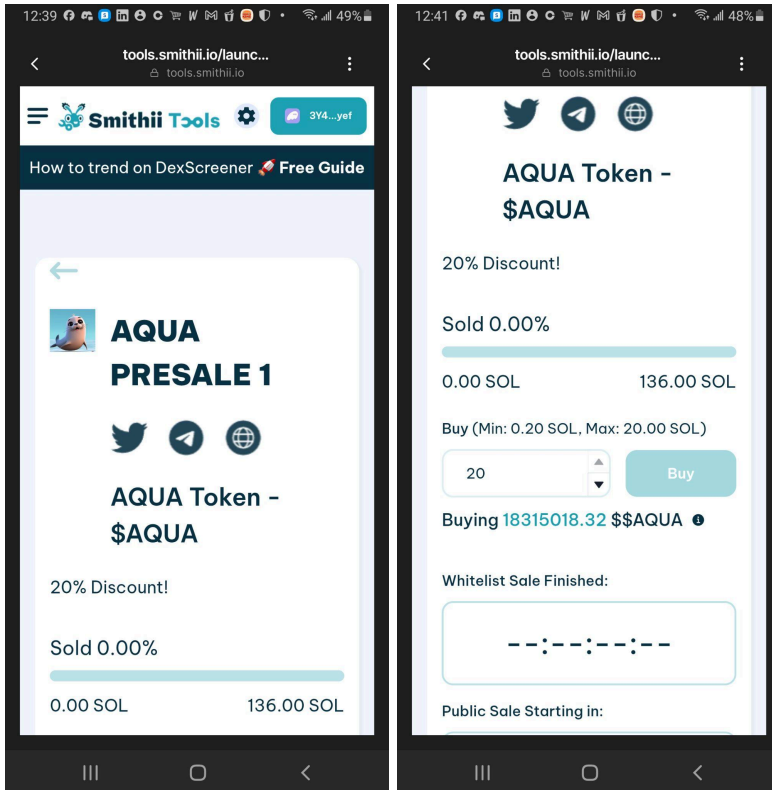

Step 4

It is now time to buy the AQUA coins!

On your phone go to: <https://tools.smithii.io/launch/AQUA---PRESALE-1>

Tap here on *CONNECT WALLET* and select *Phantom* and accept the connection

Your Phantom wallet is now connected and you can scroll down to select how many SO you want to use for buying \$AQUA and then click on BUY. You will see a confirmation page and that the coin will be released into your Phantom wallet after the Presale is finalized.
